

What is Blended Learning?

Blended learning is any time a student learns at least in part at a supervised brick-and-mortar location away from home and at least in part through online delivery with some element of student control over time, place, path, and/or pace.

4 Blended Learning Models

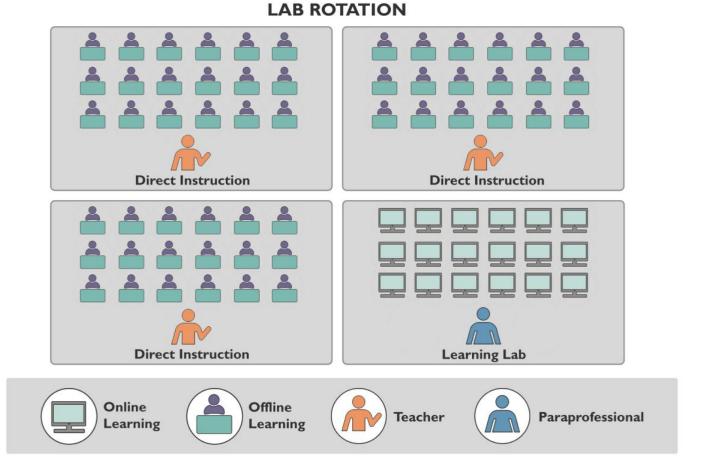

Let's explore each model!

Lab Rotation

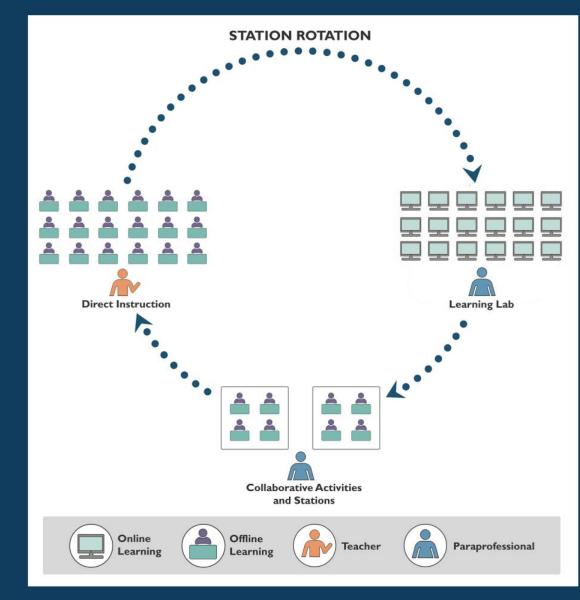

Students rotate between direct instruction and online learning.

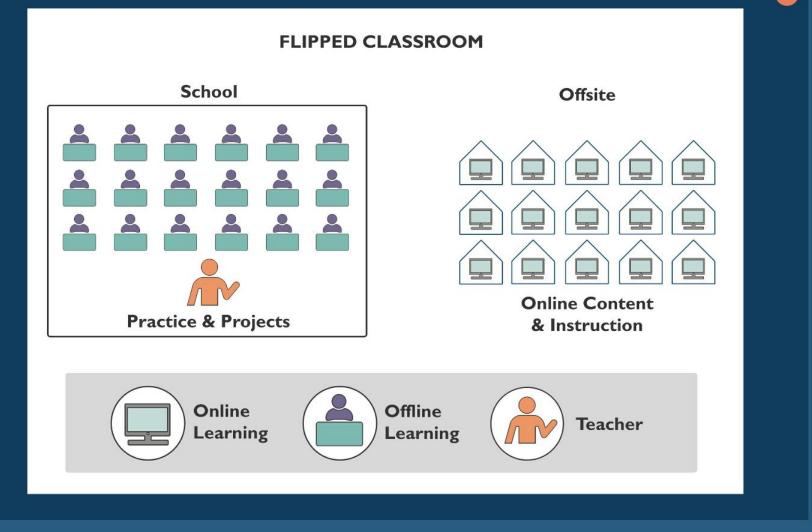

Station Rotation

Students rotate between stations in one classroom.

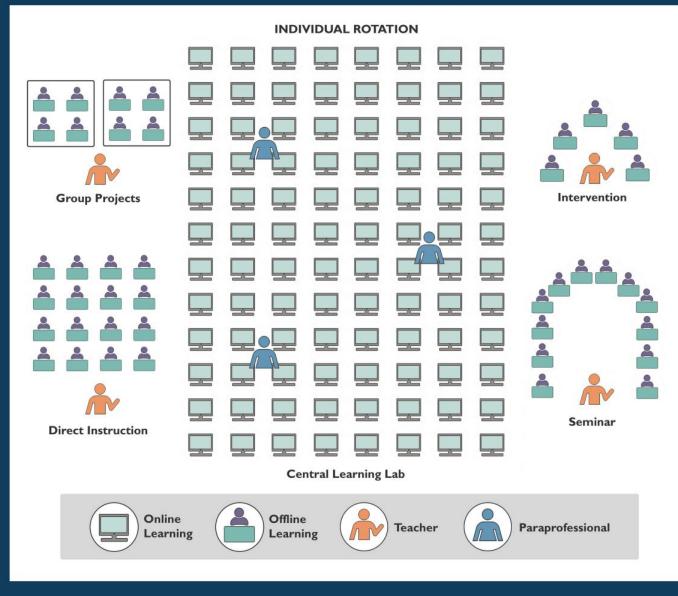

Flipped Classroom

Students access content and instruction online offsite and students get face-to-face guidance in the classroom.

Individual Rotation

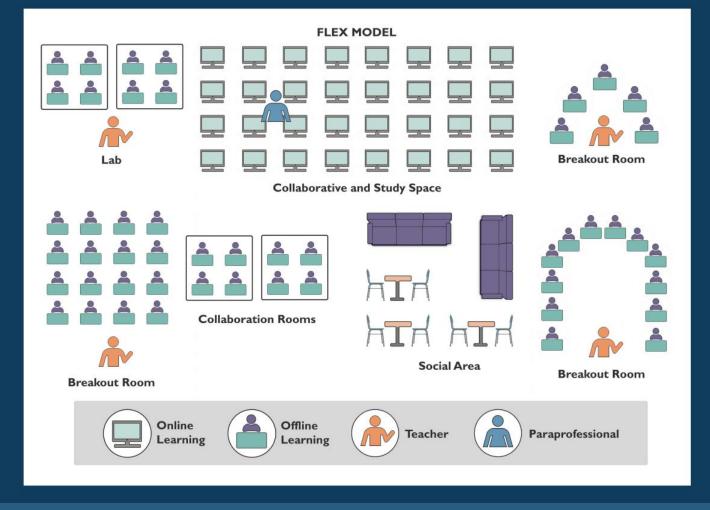

Students have their own individualized playlist.

1 /

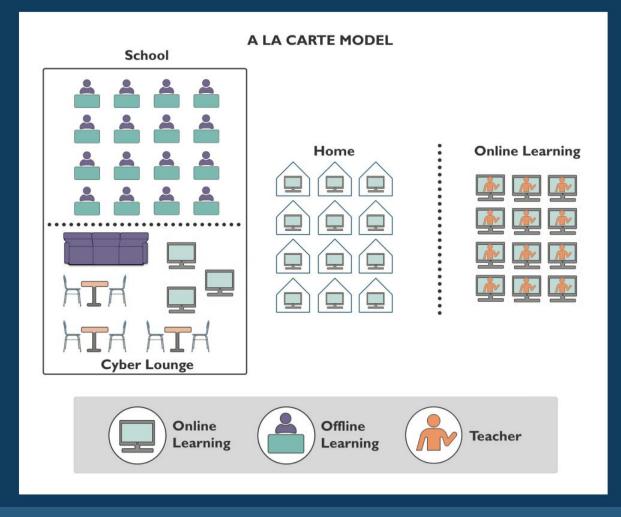

Flex Model

Online instruction is the foundation but can also direct students to offline activities. Students have an individualized schedule among different learning modalities.

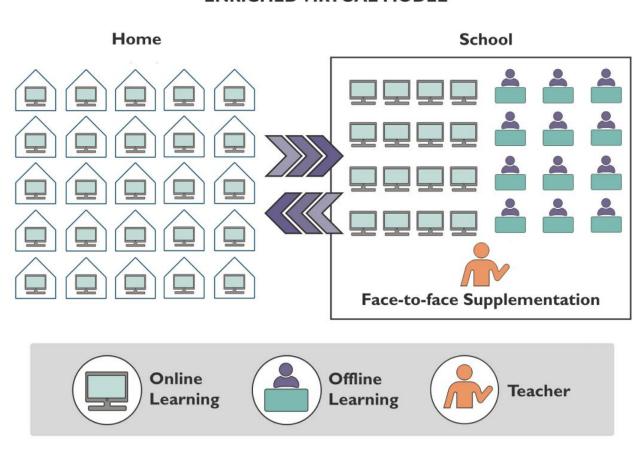

A La Carte Model

One or more courses completely online with an online teacher - either onsite or offsite. Students still have brick-and-mortar education experiences.

Enriched Virtual Model

Entire school experience - meaning each course - has students divide time between brick-and mortar coupled with online delivery of content and instruction.

ENRICHED VIRTUAL MODEL
